DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-11, drawn to use of a particulate compound as a condom finishing powder.

Group II, claim(s) 12, drawn to a condom.

Group III, claim(s) 13-14, drawn to a process for rolling a condom.

Group IV, claim(s) 15-16, drawn to a condom finishing powder.

2. The inventions listed as Groups I - IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Groups I, II and IV do not make a contribution over the prior art since Kang et al. ("The Pathological Effects of Glove and Condom Dusting Powders", Journal of Applied Toxicology, supplied by applicant in the IDS of 7/22/05) disclose a particulate, substantially water insoluble, inorganic compound having substantially spherical particle morphology (since magnesium carbonate is water insoluble and has a rounded granular morphology, see Table 1, magnesium carbonate).
